C SingleR cell-level broad labels

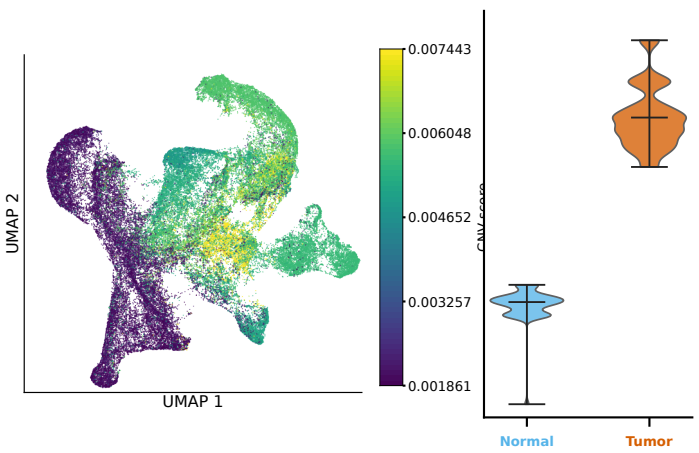

Saved H-derived UMAP · cell-level SingleR predictions after pruning

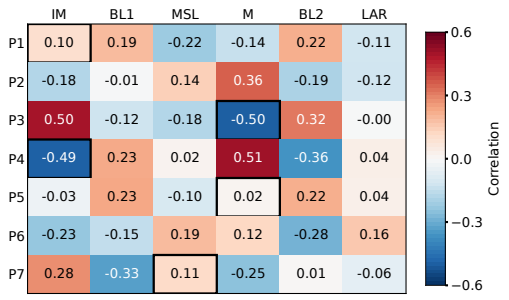

F Lineage-marker expression

E CNV score

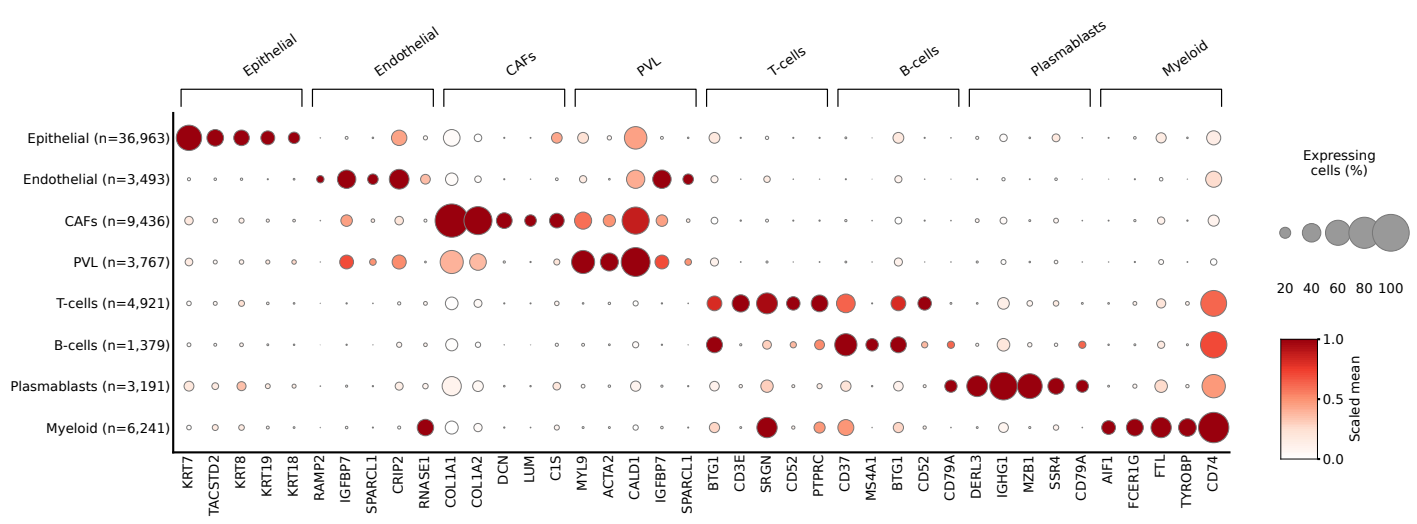

B TNBC subtype

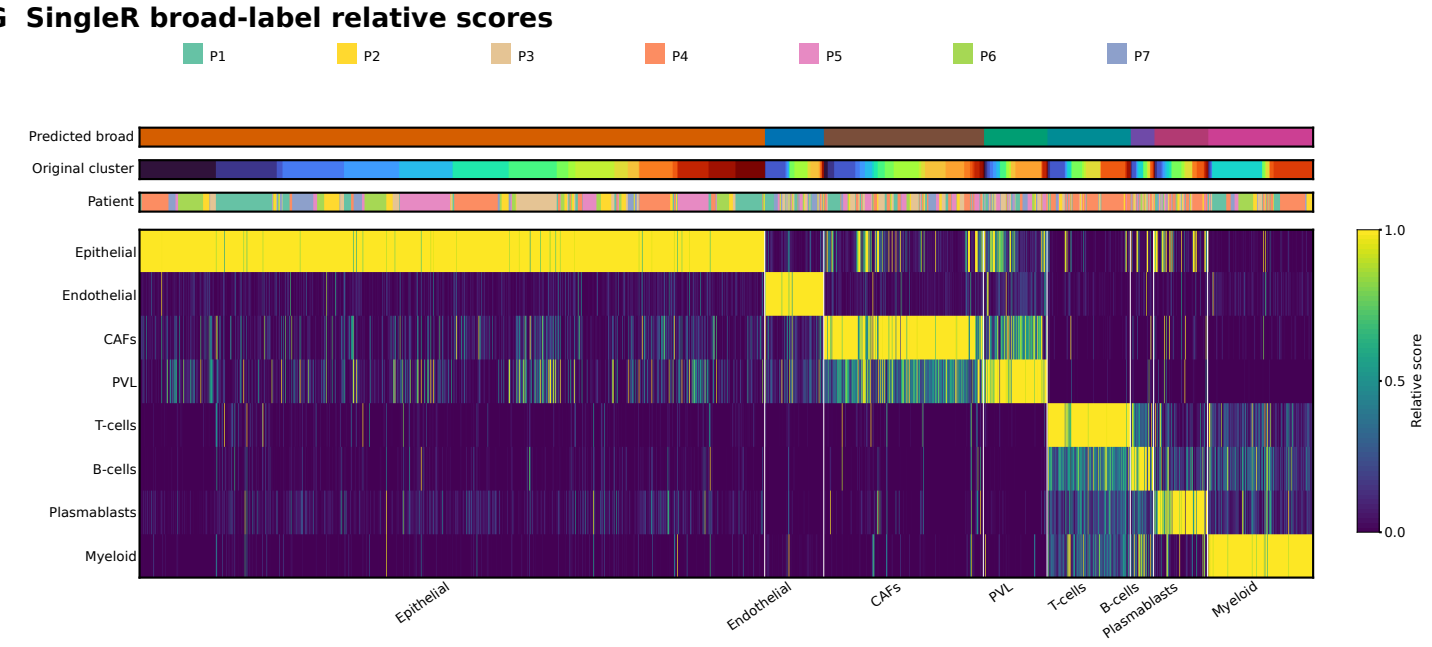

Outlined cell: assigned subtype

D Wu-reference marker expression by SingleR broad label

Dot size: fraction expressing >0 · colour: mean log expression, scaled per gene · descriptive support

G SingleR broad-label relative scores

All 69,391 cells · ordered by predicted broad label, H cluster and cell ID · within-cell scaled and cubed, not probability
