
E Folate transmembrane transport
Target: progenitor — weak association
Hydrogen sulfide metabolism
Target: luminal
Basement membrane assembly
Target: basal
DNA replication: RNA-primer synthesis
Target: cycling
Hallmark interferon-γ response
Target: IFN-response epithelial
Inferred node score (z-score)
progenitor n=27,350, p=7
luminal n=6,193, p=7
basal n=772, p=4
cycling n=2,177, p=3
IFN-response epithelial n=7,082, p=4
