Supplementary Figure 3A · candidate concordance, metabolic tasks and patient-level GO interaction

Blue: higher R or E · orange: higher NR or NE · outlined points: selected candidates

Pooled-cell metabolic-task log2(On/Pre) · top 10 per group + G/H tasks

GO: limma estimate and 95% CI · * global BH q<0.05 · diamond: descriptive median (NT) · NA: group absent
